

Whole Eggs

READY-TO-USE EGGS. NO MESS.

Crystal Lake produces whole eggs that come in liquid, frozen, or dried, plain or pH-adjusted, in 5 lb. cartons up to 48,000 lb. tankers. These are ready-to-use eggs with no mess from broken shells or waste from unusable eggs. They require less storage space than a comparable amount of shell eggs, and can be used in all dishes calling for whole eggs, such as sweet pastries and omelettes.

All Crystal Lake products are processed and pasteurized under continuous supervision from USDA's Food Safety Inspection Service. They are also Kosher Certified by Orthodox Union Supervision and produced under a routine quality inspection in accordance with good manufacturing practices.
